CAREER HISTORY

Vedantu Innovations Pvt Ltd

Software Engineer | Sep 2020 - Present

- Develop the responsive webpages using different front end technologies like Ejs, ReactJS, redux, nextJS and Media Query.
- Worked on Google tag manager (GTM) for publishing banners, ads and moved the static changes from code level to GTM.
- Working on different events like clickStream, moEngage and gaEvents for tracking the traffic on the web pages.

Egnify Technologies Pvt Ltd

Front End Developer | July 2020 - Sep 2020

- Develop features for students having day wise study plan, from which they can plan accordingly.
- Worked on Mobile App which is live on google play store (Rankguru eVidya) designed Test module from which students can take test.
- Worked on Questions Snip in which it shows questions, options, answer, solution percentage of students who did that correct, wrong and unattempted with the accuracy for that question and average time.

Front End Developer Intern | July 2019 - June 2020

- Developed Live classes with Live chats integrated with Firebase, in which only authorised users can chat and clear their doubts.
- Worked on CMS in which admin can parse the test and practice and also publish the content. Students can only see when admin published.
- Worked on Mobile App in which developed a Learn Module there students can watch videos, read materials and also watch some animations.
- Worked on Notifications in both admin and students side. Students will get the messages once admin triggered from his side.
